ECONOMICS LETTERS

Aims and scope:
Many economists today are concerned by the proliferation of journals and the concomitant labyrinth of research to be conquered in order to reach the specific information they require. To combat this tendency, ECONOMICS LETTERS has been conceived and designed outside the realm of the traditional economics journal. As a Letters Journal, it consists of *concise* communications (letters) that provide a means of *rapid* and *efficient* dissemination of new results, models and methods in all fields of economic research.
Comments or pedagogical notes are not suitable for transmission in this form.

Concise: Contributions will be limited to a maximum of 4 printed pages, allowing readers to determine their potential interest in a letter very quickly, and to digest a large amount of material in a usable form.
Rapid: Monthly publication ensures a brief manuscript turnover time (maximum 4 months from submission to final publication).
Efficient: A quick way to stay up-to-date with developments in all areas of economics.
Convenient annual index: Each article appearing in ECONOMICS LETTERS will be classified by notation. An author and subject index will be published in each last issue of a volume to facilitate reference.

Special regulations for authors—Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.
Submission of a paper to this journal entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
Special regulations for readers in the USA—This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, USA.. Not-for-profit educational institutions and instructors attached thereto, subscribing to this journal, are permitted to photocopy isolated articles for not-for-profit classroom or library reserve use without fee. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25, also payable through the Center. (N.B. For review journals this fee is $0.20 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Introduction

It is ten years since the first issue of *Economics Letters* was published. On this occasion, at the suggestion of many of our readers, contributors and editors, we are pleased to publish an index of the first 25 volumes of *Economics Letters*. In the first issue I stated that the purpose of a letters journal in economics would be to provide an extremely efficient method for disseminating new results. I believe that *Economics Letters* has served this function admirably. The turn-around time of our reviewing process and the lag between acceptance and publication is by far the shortest of any widely circulated economics journal. A glance through any issue should convince a reader of the true international character that we have achieved.

I am very pleased by these successes and am grateful to the many people who served on our editorial board during these ten years. Without their help the goals for *Economics Letters* would be unattainable. I look forward to the next ten years with the hope that we will continue to be thought of as an important outlet for new research announcements and reports on work in progress.

CATEGORY INDEX OF VOLUMES 1–25

Note to users:

This index lists the volume number of the article (in bold print), the year of publication, and the page number on which the article begins. *Economics Letters* volumes consist of four issues each containing approximately 100 pages; therefore articles beginning on pages 1–100 will be found in first issues, articles beginning on pages 101–200 will be found in second issues, and so forth.

Treasury bill financing in a dynamic macroeconomic model with a government budget constraint (023) (Smyth, D.J.) **5** (1980) 225
Trend and the measurement of world inequality over extended periods of accounting, The (921) (Maasoumi, Esfandiar and Jin Ho Jeong) **19** (1985) 295
Two characterizations of the Raiffa solution (026) (Thomson, W.) **6** (1980) 225
Two estimators for the APT model when factors are measured (521) (McElroy, Marjorie B., Edwin Burmeister and Kent D. Wall) **19** (1985) 271
Two implications of habit formation for international trade (411) (Mayer, W.) **6** (1980) 367
Two misspecification tests for the simple switching regressions disequilibrium model (211) (Hajivassiliou, Vassilis Argyrou) **22** (1986) 343
Two perils of symmetry-constrained estimation of demand systems, The (022) (Fiebig, Denzil G. and Henri Theil) **13** (1983) 105
U.S. bilateral trade balances and the dollar (431) (Cushman, David O.) **24** (1988) 363
Unanticipated inflation and economic activity (134) (Amihud, Yakov) **9** (1982) 327
Unanticipated money, 'disequilibrium' modelling and rational expectations (022) (Clements, K.W. and P.D. Jonson) **2** (1979) 303
Unanticipated movements in aggregate demand and the business cycle: Results from variance decompositions (023) (Leiderman, L.) **2** (1979) 125

Unbiased estimation of the inflationary effects of relative price disturbances (134) (Stockton, David J.) **17** (1985) 335
Uncertain lifetime and ordinal impatience (026) (Peck, Richard M. and Padamanbhan Srinagesh) **24** (1988) 121
Uncertainty and the partial loss offset provision (026) (Eeckhoudt, Louis and Pierre Hansen) **9** (1982) 31
Uncertainty and the trade union (831) (Oswald, Andrew J.) **9** (1982) 105
Unconstrained maximum likelihood estimation of contemporaneous covariances (211) (Schwallie, Daniel P.) **9** (1982) 359
Uncontrolled prices on a market with supply control (022) (Herrmann, Roland) **23** (1988) 129
Underemployment and normal leisure (821) (Brown, Murray and Elmar Wolfstetter) **15** (1984) 157
Underestimation and overestimation in stochastic input–output models, A note on the (222) (Lahiri, Sajal) **13** (1983) 361
Underestimation and overestimation of the Leontief inverse revisited (222) (Lahiri, Sajal and Steve Satchell) **18** (1985) 181
Underestimation in the Leontief model (222) (Flåm, Sjur D. and Lars Thorlund-Petersen) **18** (1985) 171
Unemployment and the replacement ratio; Some reduced form estimates for the UK (131) (Holden, K. and D.A. Peel) **8** (1981) 349
Unemployment insurance and labor supply and demand: A time series analysis for the United States (824) (Smyth, David J.) **21** (1986) 379
Unemployment insurance meets the classical labor supply model (821) (Fortin, Pierre) **14** (1984) 275
Unidimensional median voter results in probabilistic voting models (025) (Coughlin, Peter J.) **14** (1984) 9
Unimodel maximum entropy density, The (211) (Brockett, Patrick L.) **12** (1983) 261
Union effects on wages and wage growth (831) (Polachek, Solomon W., Phanindra V. Wunnava and Michael T. Hutchins) **21** (1986) 297
Union membership and employment dynamics (831) (Jones, Stephen R.G.) **25** (1988) 197
Unionization and distribution of income under variable returns to scale (831) (Parai, Amar K.) **19** (1985) 95
Unique minimal cash flow competitive equilibrium, The (021) (Shubik, Martin) **25** (1988) 303
Unique non-boundary equilibria in the Morishima system (021) (Hands, Douglas W.) **8** (1981) 303
Uniqueness of ASM solutions in rational expectations models: An example (023) (Giavazzi, F. and P. Indelli) **6** (1980) 7
Uniqueness of Nash equilibria, On the (021) (Chenault, Larry A.) **20** (1986) 203
Uniqueness of general economic equilibrium (021) (Sandberg, I.W.) **4** (1979) 99
Uniqueness of macroeconomic equilibria with quantity rationing, On the (023) (Böhm, Volker) **10** (1982) 43
Upper bound for wealth distribution in a model of accidental bequests, An (921) (Sinha, Tapen) **25** (1988) 385
Upper tail of the earnings distribution: Pareto or lognormal, The (920) (Harrison, A.J.) **2** (1979) 191
Urban unemployment and urban development: A dynamic analysis (025) (Gupta, Manash Ranjan) **16** (1984) 231
Usage-dependent peak-load pricing (022) (De Palma, André and Richard Arnott) **20** (1986) 101
Use of elasticity identities as empirical devices, A note on the (411) (Stone, J.A.) **4** (1979) 261
Use of a proxy variable in testing hypotheses, A note on the (211) (Ohtani, Kazuhiro) **17** (1985) 107
Use of a proxy variable in the test for homoscedasticity, On the (211) (Kakimoto, Sumio and Kazuhiro Ohtani) **18** (1985) 153
Use of better measured proxies in regression analysis, On the (211) (Klepper, Steven) **20** (1986) 133
Use of prior regressions in the estimation of error correction models, The (211) (Hall, S.G. and S.J. Brooks) **20** (1986) 33
Use of spline functions for seasonal adjustment, A note on the (211) (Sapsford, D.) **6** (1980) 145
Use of the principal component method in the maximum likelihood estimation procedure of the logit model (211) (White, Eugene and Hiroki Tsurumi) **12** (1983) 43
Useful equivalence properties of Hausman's test, Some (211) (Holly, Alberto and Alain Monfort) **20** (1986) 39
Using Durbin's *h*-test to validate the partial-adjustment model, On (211) (Doran, H.E.) **21** (1986) 21
Using bootstrap to obtain standard errors of system Tobit coefficients (212) (Flood, Lennart) **19** (1985) 339
Using justice principles to resolve the 'impossibility of a Paretian liberal' (025) (Wriglesworth, John L.) **10** (1982) 217
Using the directional shadow elasticity of substitution to measure the concavity of the cost function (226) (Frenger, Petter) **19** (1985) 171
Utilitarian versus egalitarian redistributions (024) (Dixit, A. and J. Seade) **4** (1979) 121
Utility correlations in probabilistic choice modelling (211) (Madan, Dilip B.) **20** (1986) 241
Utility measurement: A direct proof of Lange's conjecture (022) (Basu, Kaushik) **15** (1984) 219
Valuation of currency options and exchange rate insurance programs, On the (431) (Eldor, Rafael) **16** (1984) 129
Value allocation with economies of scale (021) (Spulber, Daniel F.) **21** (1986) 107
Value of changes in individual risk in a large mixed economy, The (024) (Gravelle, H.S.E.) **3** (1979) 145
Value of large resource deposits or, how precious are the sea-bed nodules?, The (721) (Dasgupta, Partha) **12** (1983) 369
Variability of inflation and the dispersion of relative price changes, A note on the (134) (Marquez, Jaime and Daniel Vining) **12** (1983) 243
Variability of inflation and the cross-sectional dispersion of stock returns, A note on the (134) (Chang, Eric C.) **21** (1986) 241
Variability of price changes in OECD member countries (134) (Leser, C.E.V.) **23** (1988) 49

Subscription Information:

Economics Letters (ISSN 0165-1765) is published in three volumes of twelve issues a year. The subscription price for 1989 (Volumes 29-31) is Sfrs 645.00 + Sfrs 90.00 p.p.h. = Sfrs 735.00. Our p.p.h. (postage, packing and handling) charge includes surface delivery of all issues, except to subscribers in the following countries where air delivery (S.A.L.-Surface Air Lifted) is ensured: Argentina, Australia, Brazil, Canada, China, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, Singapore, South Africa, South Korea, Taiwan, Thailand, U.S.A. For the rest of the world airmail charges are available upon request. Reduced rates for private subscribers are available from the Publisher. Claims for missing issues will be honoured, free of charge, if made within three months after the publication date of the issues. Mail orders and inquiries to: Elsevier Sequoia S.A., P.O.Box 851, CH-1001 Lausanne 1, Switzerland.

INSTRUCTIONS TO AUTHORS

(1) Papers must be in English and should not exceed 4 printed pages (or 1600 words) including diagrams, figures, tables, etc.

(2) Papers for publication should be sent in triplicate to:

Professor Jerry Green
Department of Economics
Harvard University
Littauer Center
CAMBRIDGE, MA 02138
U.S.A.

Submission of a paper will be held to imply that it contains original unpublished work and is not being submitted for publication elsewhere. All papers submitted will be refereed by the Board of Editors. The Editor does not accept responsibility for damage or loss of papers submitted.

Upon acceptance of an article, author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

(3) Manuscripts should be typewritten on one side of the paper only, double-spaced with wide margins. All pages should be numbered consecutively. Titles and subtitles should be short. References, tables and legends for figures should be typed on separate pages. The legends and titles on tables and figures must be sufficiently descriptive such that they are understandable without reference to the text. The dimensions of figure axes and the body of tables must be clearly labeled in English.

(4) The first page of the manuscript should contain the following information: (i) the title; (ii) the name(s) and institutional affiliation(s) of the author(s); (iii) an abstract of not more than 40 words. A footnote on the same sheet should give the name and present address of the author to whom the reprint order form should be addressed.

(5) Acknowledgements and information on grants received should also be given in a footnote on the first page of the manuscript.

(6) Important formulae (displayed) should be numbered consecutively throughout the manuscript as (1), (2), etc. on the right-hand side of the page. Where the derivation of formulae has been abbreviated, it is of great help to referees if the full derivation can be presented on a separate sheet (not to be published).

(7) Footnotes should be kept to a minimum.

(8) The References should include only the most relevant papers. In the text, references to publications should appear as follows: "Smith (1969) reported that..." or "This problem has been a subject in literature before [e.g., Smith (1969, p. 102)]". The author should make sure that there is a strict "one-to-one correspondence" between the names (years) in the text and those on the list. At the end of the manuscript, the complete references should be listed as:

For monographs
Tobin, James, 1971, Essays in economics, Vol. 1, Macroeconomics (North-Holland, Amsterdam).

For contributions to collective works
Glejser, Herbert, 1970, Predictive world models, in: Colette Duprez and Etienne Sadi Kirschen, eds., Megistos, A world income and trade model for 1975 (North-Holland, Amsterdam) 3–16.

For periodicals
Goldfeld, Stephen M. and Richard E. Quandt, 1973, A Markov model for switching regressions, Journal of Econometrics 1, 3–15.

(9) Illustrations should be provided in triplicate (1 *original*, professionally drawn in black ink on white paper, and 2 photocopies). The drawings should not be inserted in the text and should be marked on the back with figure numbers, title of paper, and name of author. All graphs and diagrams should be referred to as figures and should be numbered consecutively in the text in arabic numerals. Illustrations of insufficient quality which have to be redrawn by the publisher will be charged to the author.

(10) All unessential tables should be eliminated from the manuscript. Tables should be numbered consecutively in the text in arabic numerals and typed on separate sheets.

Any manuscript which does not conform to the above instructions may be returned for the necessary revision before publication.
Contributors are reminded that once their contribution has been accepted, all further correspondence should be sent directly to the Publishers [Elsevier Science Publishers B.V. (North-Holland), Editorial Department, P.O. Box 1991, 1000 BZ Amsterdam, The Netherlands]. As all proofreading will be done by the Publisher's staff and no proofs will be sent to the Author, the presentation of the manuscript should be very clear.
